Growth investors – Investing in  
businesses that make the world  
a better place

Gonçalo de Vasconcelos & Tom Britton  
Co-founders of SyndicateRoom

@GoncaloTV

@SyndicateRoom

# Average returns are attractive

@GoncaloTV @SyndicateRoom

	AVERAGE COMPANY VALUATION/MARKET CAPITALISATION		CAGR
	2011	2016	
PRIVATE COMPANY COHORT	£3,065,380	£13,808,709	33.20
LSE MAIN BOARD	£2,002,182,136	£2,532,980,538	4.58

But beware of the importance of diversification...

# Thank the taxman. No, seriously...

Up to 30% of your investment can be deducted from your income tax

COMPANY FAILS	COMPANY BREAKS EVEN	COMPANY DOUBLES IN VALUE
You invest <b>£10,000</b>	You invest <b>£10,000</b>	You invest <b>£10,000</b>
You receive <b>£3,000</b> in income tax relief	You receive <b>£3,000</b> in income tax relief	You receive <b>£3,000</b> in income tax relief
The company goes bust and your shares are worth <b>£0</b>	If after 3+ years you sell your shares for <b>£10,000</b> , you will owe no capital gains tax on profit	If after 3+ years you sell your shares for <b>£20,000</b> , you will owe no capital gains tax on profit
Your total loss is <b>£3,850*</b>	Your total gain is <b>£3,000</b>  (£0 profit from the sale plus £3,000 income tax relief)	Your total gain is <b>£13,000</b>  (£10,000 profit from the sale plus £3,000 income tax relief)

\*At a tax bracket of 45%, the loss relief would be £7,000 x 45% = £3,150. Therefore, for £10,000 invested, your real loss is £7,000 - £3,150 = £3,850
